Preface vii

Spectral diffusion in an amorphous polymer probed by single molecule spectroscopy
J. Tittel, R. Kettner, T. Basché, C. Bräuchle, H. Quante, K. Müllen 1

Variation of triplet state parameters of single pentacene molecules in a p-terphenyl single crystal
J. Wrachtrup, C. von Borczyskowski 13

Hole burning of rare earth ions with kHz resolution
N.B. Manson, M.J. Sellars, P.T.H. Fisk, R.S. Meltzer 19

Femtosecond photon echo in solids: selective spectroscopy not using zero-phonon lines
I.S. Osad'ko, M.V. Stashek 25

Homogeneous width of Eu^{3+} in silicate glass fiber measured by accumulated photon echoes
R. Yano, N. Uesugi 33

Hole burning and optical/RF double resonance studies of trigonal Ho^{3+} centers in CaF_2
N.B. Manson, T. Boonyarith, J.P.D. Martin 39

Looking into frozen proteins with hole burning
J. Gafert, J. Friedrich 45

Spectral hole burning in NMR: Experimental test of relaxation theories by using well-characterized noise fields
T. Kohmoto, Y. Fukuda, M. Kunitomo, K. Ishikawa, K. Ebina, M. Kaburagi 51

The effect of pressure, time and concentration in hole-burning studies
J.M.A. Koedijk, T.M.H. Creemers, F.T.H. den Hartog, M.P. Bakker, S. Völker 55

Optical addressing and switching of water molecules in hole-burning systems: a TLS model system
K. Barth, W. Richter 63

Stochastic theory of narrow hole-burning in low-temperature dilute ruby
S.Y. Kilin, A.P. Nizovtsev 69

Temperature-annealing-cycling hole spectra of dye and dye-oligonucleotide doped in polymer films
T.-C. Chang, C.-C. Chiang, S.-H. Chou, K. Peck 75

Glass transition of Zn-substituted myoglobin probed by absorption and site-selective fluorescence spectroscopies
J.S. Ahn, T. Kitagawa, Y. Kanematsu, Y. Nishikawa, T. Kushida 81

Equilibrium and nonequilibrium tunneling dynamics and spectral diffusion in the millikelvin regime
H. Maier, D. Haarer 87

Low temperature properties of glasses: a preliminary study of double well potentials microscopic structure
D. Dab, A. Heuer, R.J. Silbey 95

Effects of matrix correlations on inhomogeneous spectral distributions: rare-gas and polymeric systems
L. Kador, P. Geissinger, D. Haarer 101

Universal feature of weighted density of states of vibrational modes in dye-doped polymers
Y. Kanematsu, M. Enomoto, Y. Nishikawa, T. Kushida, J.S. Ahn 109

Photochemical hole burning in higher excited states (Soret absorption bands) of tetrabenzo- and tetraphenylporphins
M. Vacha, S. Machida, K. Horie 115

Electron transfer reaction from zinc(II)tetraphenylporphine to dichloromethane
N. Kishii, K. Shirai, S.-i. Tamura, J. Seto, K. Tokumaru, S. Takagi, T. Arai, H. Sakuragi 125

Thermally activated barrier crossing and hole-filling in donor–acceptor electron transfer systems
M. Tian, T. Chang, J. Zhang, H. Wang, K. Dou, B. Luo, S. Huang, J. Yu 131

Local dynamics in solid matrices investigated by malachite green optical microprobes
K.M. Abedin, J.Y. Ye, H. Inouye, T. Hattori, H. Nakatsuka 135

Energy transfer in ethane-bisporphyrin dimers studied by fluorescence line narrowing and spectral hole burning
K. Mauring, A. Suisalu, J. Kikas, E.I. Zenkevich, A.V. Chernook, A.M. Shulga, G.P. Gurinovich 141

Suppression of spectral diffusion in porphin-cross-linked polyvinylalcohol observed by photochemical hole burning
M. Maeda, K. Sakoda 149

Photon-gated spectral hole burning in a mixed meso-phenyl-tetrabenzoporphyrinato-zinc/aromatic cyanide system and hole filling induced by a gating beam
D.Y. Wang, M.X. Hu, L.Z. Hu, H.Z. He, L.Z. Zhao, Z.Z. Lu, Y.X. Nie 155

A study on multiple photon-gated persistent spectral hole burning and photoproduct in a system of frequency-domain storage material
Y. Zhao, Y. Pan, Y. Yin, L. Chen, R. Wang, F. Li, S. Yao, M. Zhang 161

Wavelength dependence of persistent spectral hole burning in Sm^{2+}-doped fluoride glasses
A. Kurita, M. Tanaka, T. Hiyama, A. Hada, T. Kushida 167

High-temperature spectral hole burning on Sm-doped single crystal materials of PbFCl family
R. Jaaniso, H. Bill 173

Room-temperature persistent spectral hole burning of Sm^{2+} in disordered fluorite-type single crystals α-$MALnF_6$ (M = Ca, Sr; A = Na, K, Rb; Ln = Y, La)
N. Kodama, S. Hara, Y. Inoue, K. Hirao 181

The $^5D_2 \rightarrow {}^7F_0$ transition probability and its effect on hole-burning quantum efficiency in $BaFCl_xBr_{1-x}:Sm^{2+}$
H. Song, J. Zhang, S. Huang, J. Yu 189

Multi-wavelength recording at room temperature by gated persistent spectral hole burning in $SrFCl_{0.5}Br_{0.5}:Sm^{2+}$
N. Umezu, T. Asatsuma, Y. Takemoto, M. Kaneko 195

Room-temperature spectral hole-burning observed from a thin film of $SrFCl_xBr_{(1-x)}:Sm^{2+}$
T. Asatsuma, N. Umezu, Y. Takemoto, M. Kaneko 201

Nonexponential hole burning in Sm^{2+} doped mixed crystals
J. Zhang, H. Song, Y. Zhao, M. Tian, K. Dou, S. Huang, J. Yu 207

Observation of persistent spectral hole-burning in semiconductor nanocrystals
Y. Masumoto, L.G. Zimin, K. Naoe, S. Okamoto, T. Kawazoe, T. Yamamoto 213

High temperature spectral hole burning on porphyrins grafted to sol–gel matrices
A.V. Veret-Lemarinier, J.P. Galaup, A. Ranger, F. Chaput, J.P. Boilot 223

Spectral hole-burning studies of organic chromophores in geometrically restricted amorphous phases
H.W. Kindervater, F.W. Deeg, C. Bräuchle 231

Quantum efficiency of the hole formation in highly oriented *J*-aggregates measured by the polarization dependent hole burning
K. Misawa, S. Machida, K. Horie, T. Kobayashi 239

Persistent spectral hole burning in dye-doped quench condensed argon-xenon matrices
T. Giering, P. Geissinger, L. Kador, D. Haarer 245

Observation of confined acoustic phonons in semiconductor nanocrystals by means of the persistent spectral hole-burning spectroscopy
S. Okamoto, Y. Masumoto 253

Selective laser excitation and inhomogeneous band broadening of Nd^{3+} ions in disordered CaF_2–YF_3 crystals
T.T. Basiev, A.Y. Karasik, R.L. Shubochkin 259

Hole burning in proton conducting oxides $SrZrO_3$:Pr^{3+}
S. Matsuo, H. Yugami, M. Ishigame, S. Shin 267

Holographic motion picture: theory and observations
H. Sasaki, K. Karaki, M. Mitsunaga, N. Uesugi 273

Femtosecond time-and-space domain holograms:diffraction on the edge of time
A. Rebane, O. Ollikainen, H. Schwoerer, D. Erni, U.P. Wild 283

Synthesis and spectroscopy of TPP derivative-doped silica gels prepared by the sol–gel process
K. Kamitani, M. Uo, H. Inoue, A. Makishima, T. Suzuki, K. Horie 291
